

**M-CARRIER**  
QUICKLY AT YOUR SERVICE

SURGICAL WORKPLACES

## M-CARRIER ERGONOMICS AT YOUR FINGERTIPS MAQUET – THE GOLD STANDARD

**MAQUET, leader of medical systems and products for over 170 years,** has been setting the standard for sophisticated workplaces in the Operating Room, Intensive Care Unit and Patient Transport. The integrated products of MAQUET are specifically designed to deliver optimal clinical treatment and therapy concepts for acute care hospitals. Within Surgical Workplaces, one of three divisions of the MAQUET Group, the new light-weight, motorized ceiling supply unit (CSU) M-CARRIER is a key component to create truly ergonomic work places.

With speed, small footprint and multiple combinations for capacity, M-CARRIER is right at your service in the ICU, OR, emergency room and NICU. At the push of a button M-CARRIER takes workflow support to a new level. The modularity of this CSU allows an ongoing integration of future modalities and technologies.

MAQUET – The Gold Standard.

## CRITICAL CARE BETTER WORK ENVIRONMENT – ENHANCED CARE

M-CARRIER's choice of distribution modules and accessories makes it extremely versatile for satisfying user requirements in a wide range of applications.

Whether to arrange an ICU's dry side or accommodating a whole NICU set-up, thanks to 80-100kg (176-221lbs) loading capacity M-CARRIER lifts and supplies an entire workstation with ease.

- Patient monitoring, CIS and the ventilator's control panel - all at an ergonomic working height.
- Capacity for numerous data ports, electrical sockets, gas outlets and even 2 vacuum/suction, as well as ambient lighting.

- Foot-end pendant: For data collection and supplies of additional equipment.
- Large action radius: Unsurpassed movement range for easy maneuvering of the workstation - right at the patient's and care-giver's side or out of the way in case of emergencies.
- The possibility to change wet and dry side supports all therapy choices.
- The smooth design is non-obtrusive and hygienic for a gentle and safe care environment.

## OR SOLUTIONS THE LIGHT-WEIGHT LIFTING CHAMPION

Especially in the OR, where space is at a premium, M-CARRER is the indispensable partner for surgical equipment and the ideal support for anesthesia set-ups.

Easy to maneuver with a convincingly large action radius and height adjustment range up to 700mm. Thus, it offers head clearance and positioning freedom at the same time.

Retracts to its parking position thanks to the long-reaching lifting arm. The motor can be well above head-level while keyboards, HF devices, imaging screens and other equipment are lowered to the individually ergonomic height of the user.

- Hybrid OR: Positions up to 4 screens like a cockpit at eye-level to compare patient information, current and recorded images at the same.
- Surgical pendant: Accommodates and supplies power and gas to surgical equipment. Also storage options for surgical accessories.
- Anesthesia workstation: CIS screen, patient monitoring and IV poles all in reach, while hoses are kept off the floor and cables are arranged in a clutter-free manner.
- GI-Suites: Space-saving overall design, cable management ducts and maneuverability optimize the workflow thereby supporting a quick turn-around.
- Safety: Unique emergency stop allows a by-stander to stop up and downwards movement instantly if required.

## M-CARRIER VERSATILE AND APPEALING

The experienced MAQUET staff strive to optimize each individually configured application – these can be planned into detail with our advanced OR3D planning tool.

Cable management, ambience and work area lighting – examples of MAQUET’s workstation essentials for well-designed arrangements.
